

CHG-MERIDIAN:

the global technology2use company at a glance

WHAT DEFINES US.

INNOVATION

Being at least one step ahead at all times is our calling card. We understand exactly what our customers need and manage their technology projects with a holistic, usage-oriented, digital approach. The full technology lifecycle is always on our mind as we develop the service portfolio of the future.

EXPERTISE

We develop, finance, and manage customized technology infrastructure all over the world. By combining commercial and technological expertise, we are a reliable single point of contact for our customers in matters of growth, digitalization, and sustainability. Our experts are strategic consultants, but also provide operational support once systems are up and running.

INTERNATIONAL PRESENCE

We are already active in 30 countries and are further expanding our international presence. On many of our projects, we work in international teams that collaborate with local partners and an international network of banks. This allows our customers to easily scale their technology to their global needs and use it across borders.

SUSTAINABILITY

The concept of the circular economy is deeply embedded in our DNA and has been shaping our business model for decades. We are aware of our economic, environmental, and social responsibilities, and accordingly focus on achieving sustainable and profitable growth. This gives our customers, partners, and employees confidence in the stability and integrity of our company.

EXPERIENCE

In order to remain competitive in today's highly dynamic markets, businesses have to be very agile and responsive. This is our area of expertise. Decades of experience have helped us to understand exactly what our customers need. That is why we have been serving them as a one-stop provider of customized IT solutions, financing concepts, and many related services since 1979.

INDEPENDENCE

We are independent of any manufacturers or banks. This enables us to provide our customers with customized and neutral advice. We offer an experienced external perspective to support you with the implementation of your technology projects and also provide appropriate financing. We talk to CFOs and CIOs as equal partners, allowing us to increase efficiency for both sides.

**BUILDING ON COMPETENCE. UNLOCKING NEW POTENTIALS.
SHAPING THE FUTURE.**

The CHG-MERIDIAN Group is one of the leading global technology2use companies. We have more than 1,300 employees and develop, finance, and manage customized technology usage models for the IT, industrial, and healthcare sectors.

We manage a technology portfolio worth € 8.95 billion (2022) and are active in 30 countries worldwide without being tied to any specific banks or manufacturers. Our customers include international corporations, SMEs, public authorities, and hospitals.

Our deep understanding of the principles of the circular economy, which we have been acquiring and expanding since 1979, is a cornerstone of our technology2use business model. We manage our customers' technology investments along the entire lifecycle, from procurement and use to data erasure, refurbishing, and remarketing of used devices at our modern technology centers.

Our headquarters are in Weingarten, Germany.
